WATERPROOF LAMINATE FLOORING

[www.aquastep.be](http://www.aquastep.be)

Aqua-Step is a great tool for creating an expressive and cosy interior at all times and in no time.

#### 💧 DID YOU KNOW?

Aqua-Step can be installed directly on damp concrete, even without a damp barrier. Aqua-Step doesn't even have to acclimatise prior to installation. When time is money, Aqua-Step is certainly the ideal solution.

◀ Limed Oak - Original

## 100% WATERPROOF

Aqua-Step, with its complete range of 100% water-resistant flooring, provides you years of comfort and a worry-free future. Aqua-Step is perfectly resistant against floods, moisture or condensation. It is suitable for kitchens, bathrooms, laundries, hallways, cellars, ... Aqua-Step is made of high quality synthetic resins. It contains no wood components. Aqua-Step has 0% swelling in all atmospheric circumstances. Aqua-Step is also recommended for project applications such as fitness rooms, restaurants, shops, ... as it meets all necessary technical specifications.

## EASY CARE

Aqua-Step can be cleaned with water and soap which results in an extremely hygienic floor. The floor stays bacteria free and is completely mould resistant (ideal for allergy sufferers). The high density surface coating and the perfect waterproof seams prevent dirt from penetrating the floor.

Kembar Teak - Wood 4V

Aqua-Step Mini - Brasília Sand

## NATURAL SILENCE

Aqua-Step is 30% more sound absorbing than traditional wood laminate. Moreover, Aqua-Step adapts itself to the surrounding temperature in an exceptional manner which makes it feel comfortably warm and cosy.

Inspired by nature, Aqua-Step waterproof flooring specialists transferred the honeycomb structure to a completely new flooring concept: a hollow floor structure that absorbs sound, conducts floorheating and outperforms on product strength.

## EASY TO LAY

Aqua-Step fits quickly and easily thanks to a special co-extruded joint in combination with the integrated world famous patented Uniclic locking system, the best in its category. The result is a floor with perfect waterproof seams. This very flexible installation system even allows you to re-install your floor several times.

With Aqua-Step you can cover large surfaces up to 900 m<sup>2</sup> (30 m x 30 m), without the use of intermediate expansion profiles. From bathroom to sleeping room, from kitchen to living room... resulting in an esthetical enhancement and enlarging your room optically. Thanks to this easy and fast installation no extra accessories are required.

## QUOTE

Who better to judge the qualities of a floor than the manager of a famous hotel in Europe? Saying quite frankly: *"After a long search, we've found what we were looking for. Aqua-Step combines the warmth and comfort which our customers enjoy and the efficiency which our staff appreciates. This floor is exceptional: it provides the hygiene of a stone floor and can even be cleaned with the industrial buffer. An excellent product!"*

## AQUA-STEP WOOD DESIGNS

The **Original** finishing has no beveled edges. The planks fit seamlessly, giving your interior a more geometric feel.

**Wood 2V** planks are slightly beveled off on the long sides. The **Wood 4V** finishing has beveled edges similar to the Wood 2V finishing, but on both the long and the short sides of the plank. The V-grooves create a sense of depth in your interior.

The **Shipdeck** designs are beveled along the long sides of the plank. The black square grooves of the Shipdeck finishing give your floor the authentic look of a ship deck.

## AQUA-STEP MINI

Aqua-Step Mini ceramic and natural stone tiles provide the same cosy sensations to the eye and touch as our Aqua-Step wood designs.

If you want to optically divide the kitchen, office, living room and lounge, then the combination of laminate tiles and wood design planks is an interesting option. With a seamless joint, you can combine a wood and a tile design. These floors are complementary but also create some variation in your interior.

The **Pearl 4V** finishing has beveled edges on all sides of the tile. All ceramic and stone designs have a pearl embossed coating that emphasises the natural look of the tiles.

**TRAVERTIN ANTRACITE** mini

◆ Original - 167 BTP

**100% WATERPROOF**

**QUARTER ROUND**  
in all matching colors  
19 x 19 x 2350 mm  
100% waterproof

The quarter round is a beautifully shaped skirting designed to cover wide gaps.

Fasten your quarter round on the wall by putting some glue at the backside.

For areas with regular floods put some glue in the angle of the quarter round and the board.

**100% WATERPROOF**

**SKIRTING**  
in all matching colors  
12 x 70 x 2350 mm  
100% waterproof

A clean-cut, minimalistic skirting board with a height of 7 cm fits in with every interior. Ideally suited to newly built houses as well as renovations.

**SKIRTING CLIPS**  
An invisible, quick and removable fastening system.  
1 bag: 30 clips, 1 clipsholder

Possibility to hide cable wires thanks to the invisible cable duct.

## DOES AQUA-STEP WORK?

**Does Aqua-Step have better resistancy to water than other laminate floors?** The biggest fears of traditional laminates are water, condensation and moisture, which Aqua-Step effortlessly withstands. Aqua-Step is the inventor and first producer of waterproof laminate flooring. Aqua-Step can be used for extensive residential and commercial applications where traditional laminate cannot. Moreover an extended warranty is given contrary to traditional laminates.

Aqua-Step can be cleaned with water and soap with 0% swelling of the boards. The floor can be held bacteria free and mould free, which is ideal for little children who love to play on the floor, allergy sufferers or pet-lovers.

**Is Aqua-Step strong enough?** The core of the board is made of a high quality synthetic resin in combination with a honeycomb structure which outperforms in product strength and results in an IC3 strength classification, the highest rating in its category. It withstands heavy loads and falling of objects. What about the strength of the locking system? Thanks to the use of the Uniclic locking system in combination with the high quality core in synthetic resins, a 100% improvement of the strength of the longitudinal and transversal locking means is obtained, unlike traditional laminate flooring. So no fears for open joints.

**Aqua-Step doesn't need expansion profiles?** With Aqua-Step you can cover large surfaces without the use of intermediate expansion profiles up to 900 m<sup>2</sup> (30 x 30 m). From the bathroom to sleeping room, from kitchen to living room...resulting in an esthetical enhancement and enlarging your room optically. This easy and fast installation is achieved with no extra accessories. This saves you extra costs and leaves you more time to enjoy your beautiful Aqua-Step floor.
